Geckos belong to the group of animals called \_\_\_\_\_.

There are thousands of types of \_\_\_\_\_ in the world.

They can be found in most countries where there is a \_\_\_\_\_ climate. Geckos come in many different \_\_\_\_\_ and sizes.

Geckos can climb on walls and \_\_\_\_\_. They use their setae on their \_\_\_\_\_ to help them to grip.

Most geckos do not have any \_\_\_\_\_. They use their \_\_\_\_\_ to lick their eyes to keep them clean. Geckos also use their tongues to catch their \_\_\_\_\_.

Geckos shed their \_\_\_\_\_. Geckos can lose their tail if they are frightened or attacked but it will grow back.

# Gorgeous Geckos

Cut out the pieces of the picture to build a gecko.

Use the information in the book to label the gecko in as many places as you can.
